Art Unit: 1616

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3-12, 14-16, 18-23, 25, 26, 38, 39 rejected under 35 U.S.C. 102(e) as being anticipated by Guskey (5,977,036).

Guskey teaches 5-50% anionic surfactant, 0.025-3% cationic polymer with a charge density of 0.2-7 meq/gm and a molecular weight of 5K to 10 million, 0.1-10% water insoluble hair styling polymer and water (abstract). Polyquaternium 10 is disclosed (column 8 lines 3-4). Polydimethylsiloxane is specified (column 22 lines 16-17). Ethylene glycol distearate is disclosed (column 26 line 36). Antidandruff agents are specified (column 17 line 38). Alkyl and alkyl ether sulfates are preferred anionic surfactants (column 3 lines 18-19). Alkyl sulfonates and alkyl ether sulfonates are disclosed (column 4 lines 22-63). 0.5% amphoteric surfactants are specified (column 5 lines 15-19). Surfactant combinations are disclosed (column 3 lines 1-4). As to the claimed complex coacervate formation, such a property must be possessed by the anticipatory composition because it is the same as that claimed.

Applicants argue picking and choosing regarding the surfactant. However, alkyl and alkyl ether sulfates are preferred surfactants (column 3 lines 18-19). Applicants argue unexpected results with a low charge density cationic polymer. However, such

Art Unit: 1616

an argument, that is, one of secondary considerations, is not germane to a rejection under 35 USC 102.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 27 is rejected under 35 U.S.C. 103(a) as being unpatentable over Guskey.

Guskey is discussed above. However, Guskey does not teach pyridinedione salts.

The examiner takes notice under MPEP 2144.03 that pyridinedione salts are well-known in the art as anti-dandruff agents.

It would have been obvious to one of ordinary skill to add pyridinedione salts to the composition of Guskey because such salts are well-known in the art as anti-dandruff agents.

Applicants argue that there is no teaching to add an anti-dandruff agent in Guskey. However, as cited in the rejection under 35 USC 102, Guskey does so teach.

No claims allowed.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1616

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
